

# London's leading Recruitment enjoys flexibility of working from anywhere

Serviced Cloud Customer Case Study

# Background

GSR2R is London's leading Recruitment to Recruitment industry. Their team relied in a Microsoft Small Business Server, but as it became due for update it was time to look at alternative solutions

## *The Challenges*

A Small Business Server requires Software Patches, Anti Virus, Electricity, Online Backup, not to mention professional IT Support.

With these costs factored in it seemed much better value for GSR2R to move to a cloud system.

## *The Solution*

GSR2R work in a fast paced environment where client service and satisfaction is key. Their computer system needs to work with them to help deliver this. The team now enjoy the flexibility of being able to work from anywhere, whilst being able to access all their resources, even from their iPhones.

### Custom Cloud Solution

GSR2R make use of a market leading recruitment system. The database systems needed to integrate with the cloud. No problem with this cloud system.

---

## *The Results*

This is a perfect example of how a small business can cut costs, and improve their systems at the same time.

# About HTL Support

HTL Support is a close knit and highly professional team of technology professionals that are evangelists for cloud solutions. This is because we believe the benefits are unrivalled by equivalent on-premise approaches to provisioning business technology.

The business benefits of the cloud are regularly highlighted in the press and deliberated in boardrooms. Cloud technology is a topic about which the vast majority of business leaders are likely to have more than a passing interest.

Based in the heart of London in Canary Wharf, HTL Support was incorporated in 2009 with a clear and simple vision. We are dedicated to helping business leaders in financial service organisations find the best way of successfully adopting cloud technology in their businesses. We offer best of breed Hosted Cloud Services in our ISO27001 London data centres, and help clients to create their own Private Cloud systems in their own offices or data centres.

Our friendly and professional engineers and consultants have extensive experience, proven track records and 'can-do' attitudes. We offer independent advice but partner with the leading cloud technology companies to ensure seamless support. We are serviced focused; our client's satisfaction is paramount.
